Memories

With her vibrant images and natural and relaxed style, Claire Burns specialises in wedding and lifestyle portraiture as she has a creative desire to capture the true spirit of her clients.

As we continually change throughout our lives Claire feels it is important to record significant stages and events as we are never able to get these moments back. Whether it is at an inspiring location, your wedding or your own home, Claire will provide you with an incredible experience that is fun and relaxed.

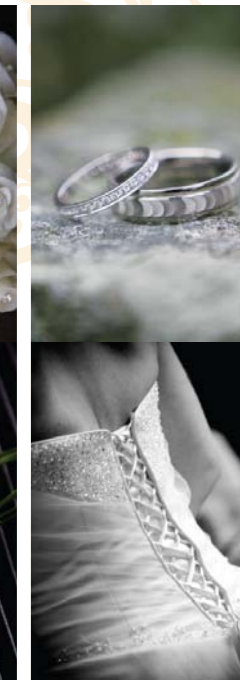

Romance

You want your wedding photographs to be a true reflection of the events, feelings and emotions of the day – an emotionally charged and intensely personal experience.

You rarely get to experience or even remember every detail of your day so it's Claire's aim to capture these precious moments so that you can reflect and continue to **relive the emotions, joy and see the people you love, in the future.**

Capture the Spirit

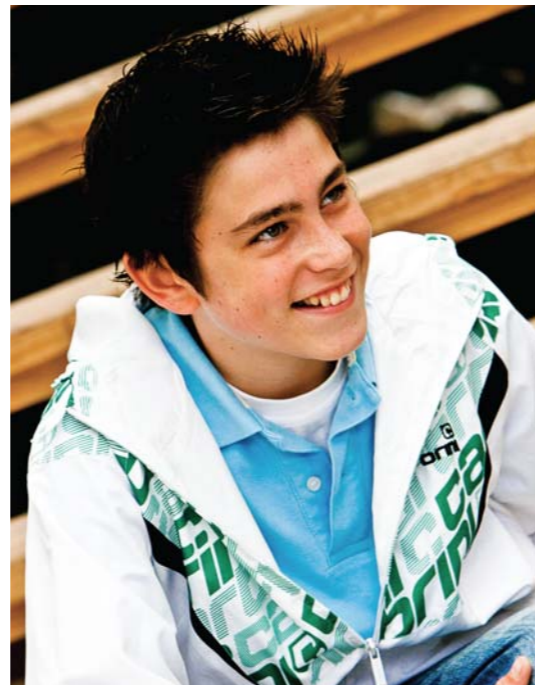

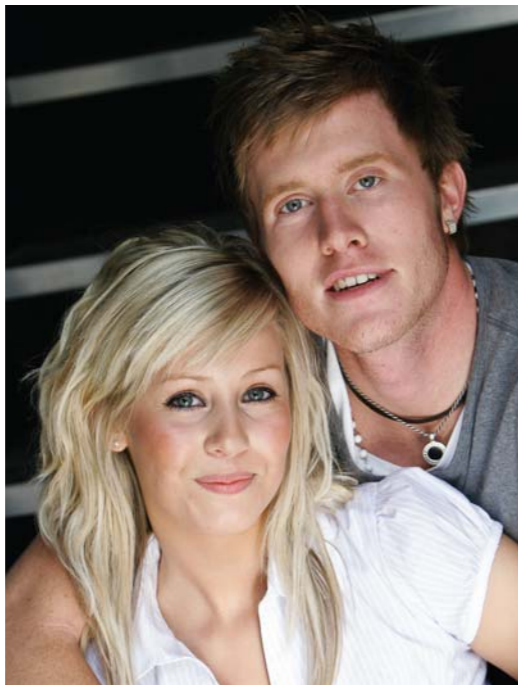

Through moments in our life, photographs have the unique ability to create and even transform the perceptions we have about ourselves and our loved ones.

They become vivid keepsakes of life's most amazing and personal experiences.

Laughter

Take this time to capture your family's memories...
as these photographs will be the way in which
you and your children share again the joy of their
childhood in the years to come.

It is important for Claire to capture the individual personality of her clients, their interaction together and love for each other and she does this in a creative and distinctive style unique to her.

Claire looks to produce high quality, striking images that capture the bonds and intimacy that exist in all families.
